Exciting news! I just completed a project utilizing Power BI to analyze and visualize key metrics in the automotive industry. I dug deep into average selling prices for v3 and v4 cars, explored the number of cars makes, total car owners, and total car names. Additionally, I uncovered insights into kilometer driven by owners, car transmission, best-selling year, engine types, and mileage driven.

My data-driven journey continues, and I can't wait to share more updates with you! Special thanks to Israel Afolabi for his unwavering support and motivation throughout the project. His guidance has been invaluable, and I am grateful for the opportunity to collaborate with such an inspiring leader.
